

Media Arts Volunteers

We are looking for interested people, who have skills or knowledge of the visual and media arts, to volunteer for the SankofaSpirit, Passport to Adventure program. In this program, we will teach youth the basics of putting together a short video. They will learn how to tell their own stories through the use of visual and aural material captured through the video camera, and how to put this material together in an edited final piece. We are looking for volunteers who have skills or knowledge in any stage of the video process - from story boarding to filming to editing - or who have knowledge of the skills involved in creating a media composition. We are also looking for video editors, preferably with knowledge of Final Cut Pro, and of any skill level. Editor will help put together the footage from past Passport to Adventure programs, and also help the current students during their editing training. Submit resumes to info@sankofaspirit.com
